## Top Skills

Microbiology
Molecular Biology
Aseptic Technique

## Certifications

Pfizer UK - Molecule to Market Job Simulation
MATLAB Certified
OSHA 10-Hour
LifeArc - Life Sciences: Biology Research Job Simulation

## Honors-Awards

Presidental Award for Educational Excellence
Presidental Award for Educational Excellence
Helen Buckman Award
Player of the Year
Summa Cum Laude

# Jamie Shisler

Biological Engineering Student at Purdue University
Pipersville, Pennsylvania, United States

## Summary

I am a junior Biological Engineering student at Purdue University with a concentration in cellular and biomolecular engineering and a minor in biotechnology. I am interested in biomanufacturing and cell therapy, particularly the engineering and lab work involved in developing and producing these treatments. I am especially interested in areas such as phage therapy. Outside of my coursework, I am involved in Purdue iGEM and ASABE, and I perform as a violinist in the Purdue Symphony Orchestra and Chamber Ensembles.

## Experience

### RESPEC

SWE - Engineering Intern
May 2026 - Present (3 months)
Pipersville, PA

### Purdue iGEM

Undergraduate Researcher – Synthetic Biology & Coral Resilience
August 2025 - February 2026 (7 months)
West Lafayette, Indiana, United States

• Designing a UV-protective “coral sunscreen” microbe using synthetic biology
• Engineering E. coli to express the fluorescent protein Sirius for UV-B absorption and stress reporting
• Designing custom primers and cloning constructs into reporter plasmids
• Researching and testing heat- and light-responsive promoters and gene circuits
• Managing project documentation, plasmid resources, and gene database research

### SEA-PHAGES Biotechnology Laboratory

Undergraduate Researcher
August 2025 - December 2025 (5 months)
West Lafayette, Indiana, United States

- Isolated and characterized bacteriophages using plaque assays and Arthrobacter globiformis host cultures
- Performed serial dilutions and plaque picking to amplify phage populations and generate countable plates
- Troubleshot repeated low plaque yields by adjusting plating technique, dilution strategy, and sample selection
- Evaluated experimental results and identified factors affecting phage growth, including plaque size and sample quality
- Prepared phage lysates and contributed to downstream analysis, including DNA extraction and database archiving

### Lessonpal
Violin Instructor
June 2023 - September 2024 (1 year 4 months)

Taught private violin lessons to beginner and intermediate students online. Created personalized lesson plans and helped students build technique and confidence over time.

### Kimberton Whole Foods
Front End and Grocery Associate
July 2023 - August 2024 (1 year 2 months)
Ottsville, Pennsylvania, United States

Handled both checkout and stock responsibilities. Helped manage inventory, solved day-to-day issues, and kept things running smoothly during busy shifts.

### Philadelphia Sinfonia Association
Violinist
September 2021 - May 2024 (2 years 9 months)
Philadelphia, Pennsylvania, United States

### The Tea Can Company
Trainer & Production Team Member
June 2021 - July 2023 (2 years 2 months)
Pipersville, Pennsylvania, United States

Trained new hires and supported day-to-day production of custom tea orders. Filled and labeled tea cans, packed subscription boxes, and prepped products for retail shows and markets.

## Education

### Purdue University
Bachelor of Science - BS, Biological Engineering · (June 2024 - May 2028)

### Central Bucks High School East
High School Diploma  · (August 2021 - June 2024)
