Charlie Harper

Information Technology Intern at Kin Insurance
Evanston, Illinois, United States

Summary

I'm a student developer interested in IT, systems administration, networking, automation, and software development. I enjoy building real projects, solving technical problems, and learning how systems work from the inside out.

I have hands-on experience with Linux, Ubuntu Server, Docker, Portainer, Cloudflare, DNS, VPNs, SSH, self-hosted services, and web development. I run and troubleshoot my own server environment, where I work with tools like Jellyfin, Home Assistant, Open WebUI, Ollama, Sonarr, Radarr, and other Docker-based services.

I also build web apps and personal projects using HTML, CSS, JavaScript, React, Tailwind CSS, Flutter, Dart, and Python. My projects have included personal websites, productivity tools, chat apps, automation experiments, AI tools, and server-based setups.

I'm especially interested in IT support, infrastructure, automation, networking, and building useful software. I'm looking for opportunities where I can keep learning, contribute to real technical work, and grow my skills in a professional environment.

Experience

Kin Insurance
IT Intern
June 2026 - Present (2 months)
Chicago, IL

Education

New Trier High School District
· (2024 - 2028)
