Steven Rathod

Associate IT Manager | Identity & Access Management (Okta · JumpCloud) | SaaS Operations | SOC2 Compliance | Open to IT Manager, IAM Engineer, SaaS Ops & InfoSec Roles

Des Plaines, Illinois, United States

Summary

I'm an IT leader with 4+ years managing the full technology stack for a 100% remote InsurTech company — specializing in identity and access management, SaaS operations, endpoint management, and security compliance. My day-to-day sits at the intersection of IAM engineering and IT operations. I administer Okta as a primary IdP — designing automated lifecycle workflows, enforcing MFA policies, and managing SSO/SCIM integrations across 40+ SaaS tools. I manage cross-platform endpoint fleets via JumpCloud MDM with Zero-Touch deployment through Apple Business Manager and Windows Autopilot. And I govern the entire SaaS ecosystem through BetterCloud — tracking licenses, managing renewals, eliminating shadow IT, and optimizing spend. On the security and compliance side, I maintain audit-ready SOC2 posture using Okta logs, JumpCloud security policies, and BetterCloud alerts, and I've worked directly with Information Security on internal risk audits. Beyond the technical work, I've led Agile Sprint Reviews, managed multi-million dollar IT budgets, directed high-volume hardware procurement through CDW, SHI, and Apple, and scaled IT operations through rapid hiring cycles. I'm currently exploring roles in IAM Engineering, SaaS Operations Management, IT Operations, InfoSec/GRC, and Corporate IT — particularly at remote-first or hybrid tech companies where the stack looks like Okta + JumpCloud + Google Workspace. Core stack: Okta · JumpCloud · BetterCloud · Google Workspace · Kandji · Drata · GitHub · Confluence · Jira · AWS Certifications: AWS Certified Cloud Practitioner · Okta Certified Professional (in progress) · Google Workspace Admin (in progress)
