Dave A.

Operational Risk Management, Regional head at Crédit Agricole CIB
Singapore, Singapore

Summary

Chartered Accountant (SG) with a proven track record in financial management & control, financial planning & analysis, operational & technology risk management and audit assurances. More than 17 years of work experience in large financial institutions spanning across regional offices and technology units.

Am currently serving as the Regional Head of Operational Risk Management for Asia Pacific, overseeing 9 network locations. In my current work, I focus on strengthening risk culture, improving processes and aligning teams across Asia so that operational risks are managed proactively.

I believe healthy professional working relationships are the foundation of sustainable success, where employees feel empowered to contribute their best and improving their decision making.

Beyond my professional life, I am passionate about sports - especially football - which has taught me the value of teamwork, discipline and persistence. I carry these values into my work every day, trying my best to inspire others around me, and playing to each other's strengths to achieve shared objectives.
