John Glasgow

CEO & CFO @ Campfire | The AI-native ERP
San Francisco, California, United States

Summary

Hi! I'm John - I founded Campfire to help high-growth companies scale without needing to hire large finance teams.

I led the \$625M sale of Invoice2go to Bill.com. Now at Campfire, we've raised \$100M+ and are helping lean teams at companies like Replit, PostHog, and Decagon automate their accounting work so they can scale 20x without scaling headcount.

I post about:

- The future of accounting software and AI in finance operations
- Practical strategies for CFOs navigating legacy system limitations
- Lessons from scaling finance teams and leading M&A deals
- How mid-market companies can automate workflows

Follow along if you're a finance leader looking to modernize your accounting operations.

If you're interested in seeing Campfire in action, shoot me a DM.
